I have audited the accompanying balance sheet of Investment Planning Corporation as of December 31, 2001 the related statements of income and retained earnings, stockholder's equity and cash flows for the year then ended. These financial statements re the responsibility of the Company's management. My responsibility is to express an opinion on these financial statements based on my audit.

My examinations were made in accordance with generally accepted auditing standards and the applicable requirements of the Securities and Exchange Commission, and accordingly, include such tests of the accounting records and other auditing procedures as I considered necessary in the circumstances. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe my audits provide a reasonable basis for my opinion.

In my opinion, the aforementioned financial statements present fairly, in all material respects, the financial position of Investment Planning Corporation as of December 31, 2001 and the results of its operations and changes in financial position for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year

SUPPLEMENTARY REPORT ON INTERNAL CONTROL

Investment Planning Corporation 2701 Cottage Way Ste 5 Sacramento CA 95825

I have examined the financial statements of Investment Planning Corporation for the year ended 31 December 2001. As part of my examination, I made a study and evaluation of the internal control accounting system to the extent I considered necessary to evaluate the system as required by generally accepted auditing standards and Rule 17A-5 of the Security and Exchange Commission. The scope of the review and tests should be sufficient to provide reasonable assurance that any material weakness existing at the date of my examination would be disclosed. Under these standards, the purposes of such evaluations are to establish a basis of reliance thereon in determining the nature, timing and extent of other auditing procedures that are necessary for expressing an opinion on the financial statements and to provide a basis of reporting material weaknesses in internal control.

There are inherent limitations that should be recognized in considering the potential effectiveness of any system of internal accounting control. In the performance of most control procedures, errors can result from misunderstanding of instructions, mistakes in judgement, carelessness, or other personal factors. Control procedures whose effectiveness depends on segregation of duties can be circumvented intentionally my management with respect to the estimates and judgements required in the preparation of the financial statements. Further, projections of any evaluation of internal accounting control to future periods is subject to the risk that the procedures may become inadequate because of changes in conditions and that the degree of compliance with such procedures may deteriorate.

Investment Planning Corporation is not engaged in a general securities business. The registrant limits its activities to the sale of shares of regulated investment companies, life insurance and annuities. In consummating these sales, the customers make their checks payable to the distributors or custodian of the fund or insurance company. Annuities, when received by the registrant are immediately delivered to the consumers in person or by mail. In mutual fund plan

Investment Planning Corporation 25 February 2002 Page 2

accounts, the distributor or custodian holds the shares and accounts directly to the customer on a periodic basis.

My study and evaluation of the system of internal accounting control for the year ended 31 December 2001, which was made for the purposes set forth above, and would not necessarily disclose all weaknesses in the system which may have existed during the period under review, disclosed no weaknesses that I believe to be material for the size of the operation.
